

Xerox® WorkCentre 7245 and iXware FaxBox: Streamlined Fax Workflows

The xxxx company is a leader in the development of alternative-energy generation systems including wind turbines and biogas plants, and has future plans for developing geothermal energy systems.

The Challenge:

The xxxx company — a German manufacturer of wind turbines and biogas plants — required a faster, more secure and cost-effective method for sending a large volume of fax communications.

The Solution:

Together with IT-SCom GmbH — a Xerox Alliance Partner — the Xerox CCSS BV-comOffice analysed the customer's needs and specified the installation of a WorkCentre 7245 multifunction system in combination with an iXware fax server.

The Results:

The company has benefited from the combined WorkCentre-iXware solution through a streamlined faxing process that requires only three steps to send a fax instead of the previous six steps. Plus, all outgoing faxes are now stored on a centralised server, ensuring greatly enhanced document security.

Working together...getting results.
Together we can.
